

Limited Warranty
Of
Workmanship

Limited Warranty of Workmanship. Our workmanship is warranted against failure for 1,000 miles or 30 days from date of service, whichever occurs first. Customer shall immediately cease operating the vehicle in the event of fluid leaks, illumination of oil warning light, gauge(s) loses pressure, or unusual noises after service has been rendered. Continued operation of vehicle under such conditions will render the Limited Warranty null and void. Should any problems occur, the Customer shall immediately notify Fast Change Lube & Oil, Inc. ("Fast Change") and give Fast Change the initial opportunity to inspect and cure any defects. Tampering with or any alteration of Fast Change's products, or the manufacturer's original equipment, or initiation of repair work by another party prior to notification and inspection by a Fast Change representative will render the Limited Warranty null and void. Customer must present his or her invoice, together with a sample of any product involved to support a claim.

The Limited Warranty does not include any financial responsibility by Fast Change for a car rental, loss of times, loss of use of vehicle, loss of earnings, or any other incidental loss. This Limited Warranty does not cover the defect, damage or deterioration due to normal use, wear and tear or exposure. Further, Fast Change does not warranty transmissions or radiators with mileage in excess of 80,000 miles.

IMPORTANT
INFORMATION ABOUT
YOUR
TRANSMISSION
SERVICE

Transmission fluid exchange services performed on vehicles is a preventative maintenance procedure designed to keep your vehicle's transmission fluid clean and operating smoothly. This procedure is not intended to correct any type of transmission problem, i.e. slipping, hard shifting or failure to shift gears.

If your vehicle is experiencing any type of transmission problem, it is recommended that the problem be diagnosed by a certified transmission professional and corrective action taken as necessary. A preventative maintenance transmission service will not correct a transmission problem and in fact may make the symptoms more severe.

This procedure is completely safe for a transmission that is in sound condition and that has been properly maintained. This service is recommended preventative maintenance for your vehicle.

IMPORTANT
INFORMATION ABOUT
YOUR
COOLING SYSTEM
SERVICE

Cooling System Fluid Exchange Services performed on vehicles is a preventative maintenance procedure. This procedure is designed to keep your vehicle's cooling system clean and free of rust, scale deposits, and to renew your coolant. This procedure should be performed in accordance with the manufacturer's recommendations and your driving conditions. Please keep in mind that this service is not intended to correct an overheating problem, a clogged radiator, failing water pump or malfunctioning thermostat.

If your vehicle has been overheating, we recommend the source of the overheating be investigated and corrective action taken before this service is performed. A vehicle that has been overheated is subject to severe damage and in most cases a cooling system service will not correct the overheating problem. Additionally, it is possible that a "flushing" process will fully expose problems such as a cracked or weakened head gasket or intake gasket, worn water pump, deteriorated water jackets or radiator.

The Cooling System Service is completely safe for a cooling system in sound condition and is recommended preventative maintenance for your vehicle.
